

M-Box

from Tunit Media

What is M-Box?

The M-Box is an innovative motion display that will soon become the most popular in the market. It features easy operation, durability, versatility in both size and direction (vertical and horizontal models), no assembly required, with the added benefit that is given by the movement; you will generate additional sales and increase profits. Our technology enables us to obtain a smooth, strong, even light that illuminates the moving sign completely.

Revolutionary

The move away from digital displays is a key feature of the M-Box. The juxtaposition of sharp images, subtle movement and even illumination make the M-Box stand out from the competition.

Captivating

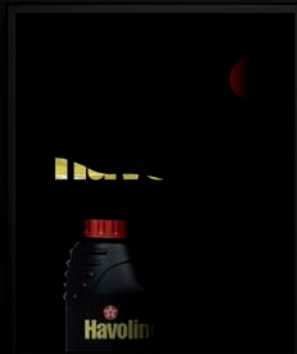

The M-Box displays a truly captivating moving image that makes audiences stop and stare. Unlike digital displays, none of the elegance is lost close up to the M-Box, meaning the strength of the message is maintained at any distance.

Simple

The simplicity of the M-Box means maintenance is low and films can be changed quickly and easily. With little to go wrong, the M-Box is reliable and so is suitable for locations with little access.

Applications

Terminals and Interchanges

The M-Box is perfectly suited to fast-moving interchanges and terminals where potential customers have little time to stop and stare. The M-Box quickly catches their attention where conventional advertising is left in the dark.

Busy Public Areas

The captivating motion of the M-Box means it catches people's eye much easier than standard advertisements, making it a perfect communication device for busy public areas.

Retail Locations

The compact versions of the M-Box are ideally suited to retail counter tops or other areas where space is limited. The elegance of the M-Box maximises the use of all spaces, no matter how small.

The flexibility of the M-Box means it can be tailored to a specific solution, meeting the needs of both consumer and client. Custom sizes can be requested to fit large scale public areas, such as airports, train stations or shopping centres. M-Box also replaces many conventional advertisements, such as those integrated into bus stops, bill boards or static backlit displays. Because the M-Box is not a digital display, no data feed or storage medium (such as a hard drive or DVD player) is needed; simply a power supply. This means the M-Box is perfectly suited to areas with restricted access.

Product Range

The M-Box range ensures flexibility for the customer whilst keeping costs down. The M-Box ranges from small counter top sizes (10.5" screen) to large wall mounted units (72" screen) at a fraction of the cost of conventional digital displays. Portrait and landscape models are available to order with custom artwork designed on request for each size.

V10: 10.5" Screen

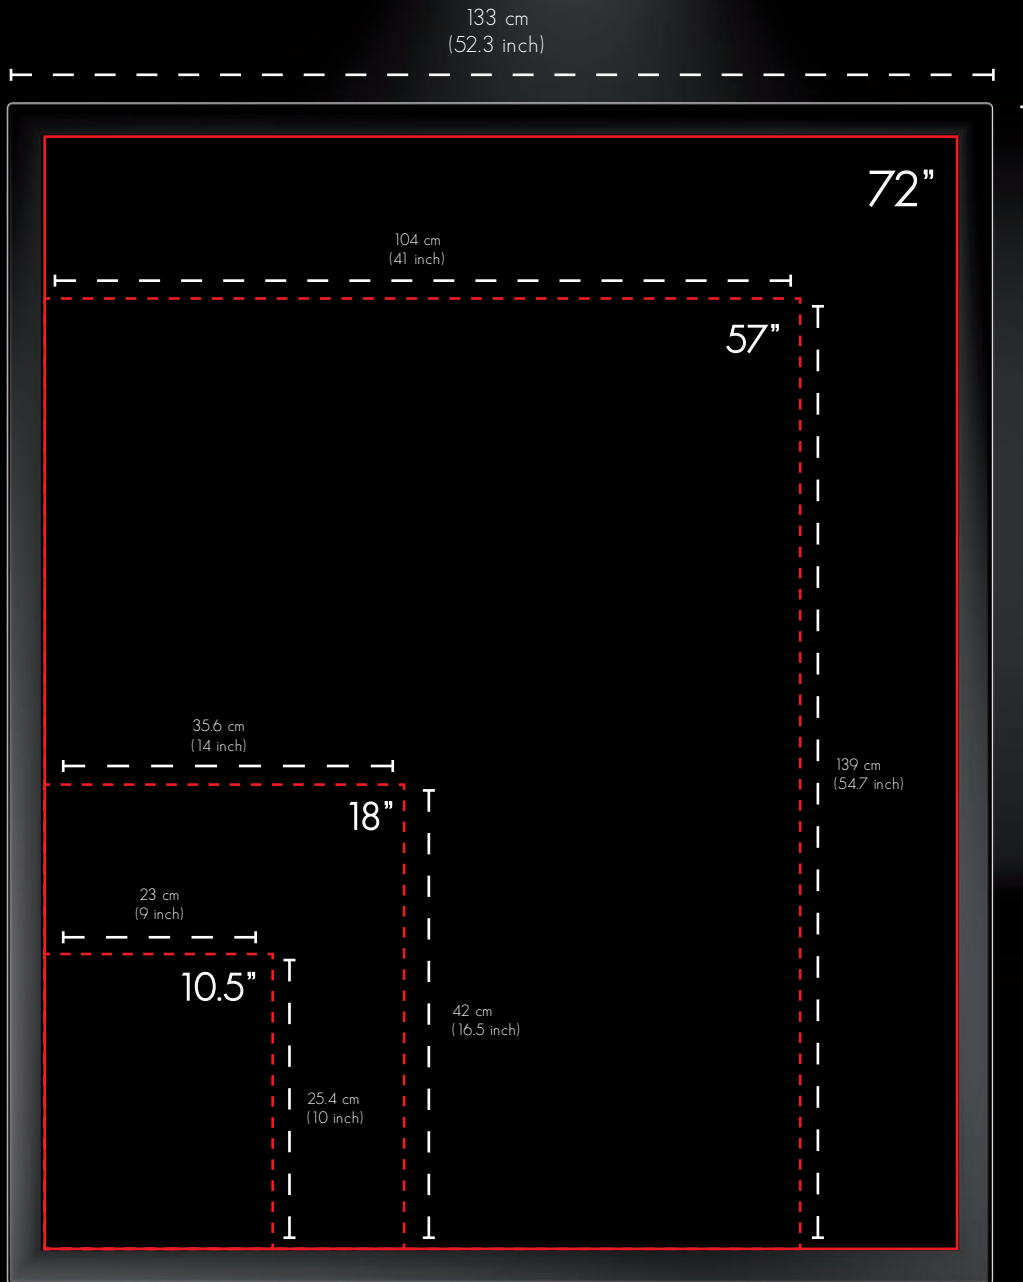

V18: 18" Screen

V57: 57" Screen

V72: 72" Screen

Specifications

72" (V72)

Screen: 72"
 Height: 192 cm
 Width: 133 cm
 Depth: 15.3 cm

Weight: 120 KG

Power: 220 V
 Cycle: 25 Sec.
 Bulbs: 12

57" (V57)

Screen: 57"
 Height: 139 cm
 Width: 104 cm
 Depth: 15.3 cm

Weight: 80 KG

Power: 220 V
 Cycle: 20 Sec.
 Bulbs: 8

18" (V18)

Screen: 18"
 Height: 42 cm
 Width: 35.6 cm
 Depth: 7.7 cm

Weight: 3.2 KG

Power: 12 V
 Cycle: 40 Sec.

10.5" (V10)

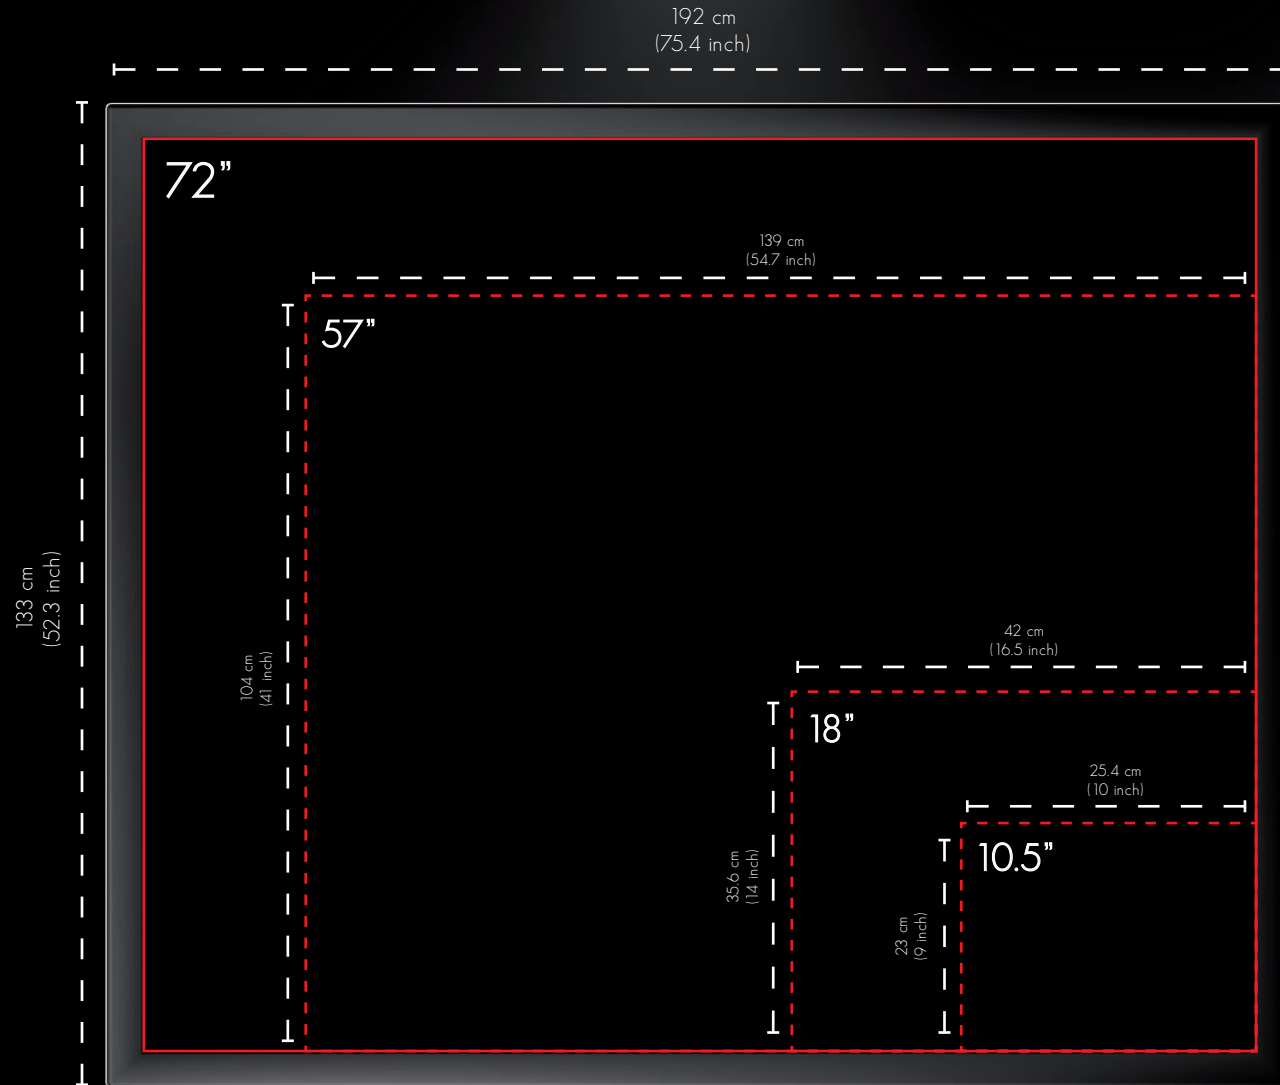

Screen: 10.5"
 Height: 25.4 cm
 Width: 23 cm
 Depth: 7.7 cm

Weight: 2.2 KG

Power: 12 V
 Cycle: 30 Sec.
